Ruchi Bedi
Aon, Lead Recruiter

February 17, 2015

Dear Ms. Bedi,

I am writing to you regarding the Software Engineer position at AON Canada. I am very excited about the possibility of joining the Software Engineering Team.

My studies at the University of Toronto Computer Science program has allowed me to familiarize myself to an extensive set of programming knowledge. At the University of Toronto I have had the opportunity to learn and apply programming languages such as Python and Java in various projects throughout my degree. Of the many projects I have accomplished, a few noteworthy one include; a Web Socket server with SSL using Java, an image analysis program with Python, and implemented AES-128 encryption algorithm in Python. Through the knowledge and experience I have accumulated I have developed a good and understanding of computer architecture and networks. Currently I am part of small development team working on a closed source mobile application which aims to create a better music recommender system.

I believe my technical skills and experience qualify me for the Software Engineering position at Aon plc Canada. Enclosed is my resume and if you have any questions or concerns, I am available via email (derek.hc.lai@gmail.com) or phone(416-889-8381). I look forward to hearing from you soon. Thank you for your consideration and your time.

Sincerely,

Derek Lai
